The institute is under construction and is scheduled to be operational in October 2022.

Layout of the institute

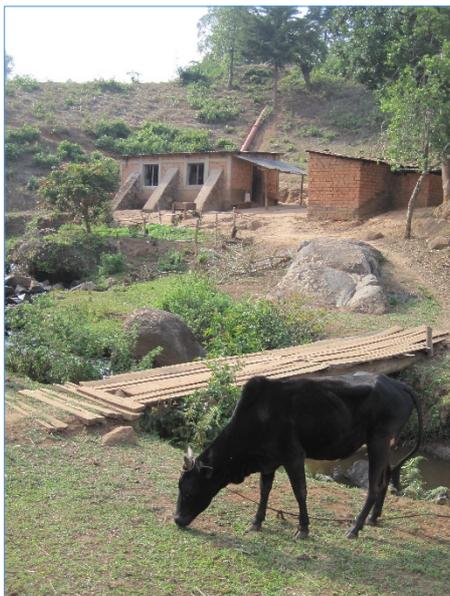

- Administration
- Classrooms
- Conference hall
- Kitchen and storage
- Accommodations

Programs for:
-medical laboratories
-nursing and obstetrics
-clinical medicine to diploma level

Licht für Afrika e.V.
supports the
hydroelectric power supply

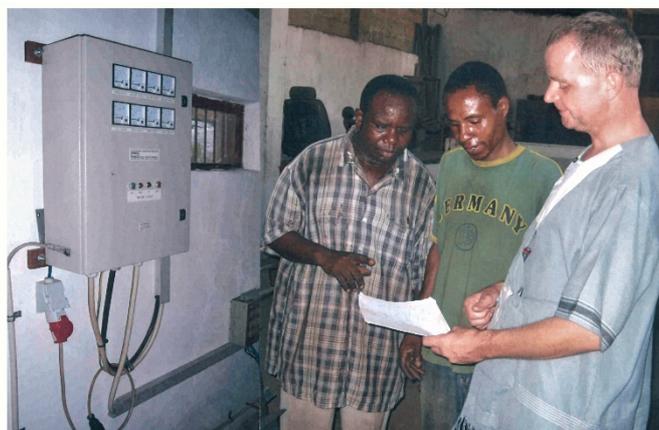

The romantic mill of Homora becomes an electricity plant.

The flour mill on this picture gives way to a generator. A replacement mill is being built in the village.

A power line from the mill to the LIHETI Institute (1.3 km) must be constructed.

Brother Maximilian OSB, our partner on site, supports to ensure that electricity flows from the generator to the socket.

In case you would like to contribute to the project we welcome your donation under the keyword "Liheti".
